

JOURNAL OF
CHINESE SOIL AND WATER CONSERVATION

Vol.47, No.2

June 2016

CONTENTS

Papers

1. The Influence of the Flow Field and the Bed Form by Bent Vegetation Arrangements on the Riverside ----- *Jin-Fu Li, Chin-Yang Huang, Su-Chin Chen*-----53
2. Analysis and Simulation of Live-Bed Pier Scour Evolution in Steady and Unsteady Flow Conditions ----- *Hsun-Chuan Chan, Po-Wei Lin, Jhih -Syong Peng, Jian-Hao Hong*-----61
3. Mann-Kendall Test and Theil-Sen Estimator for Long-Term Spatial and Temporal Trends of Streamflow in Taiwan ----- *Hsin-Fu Yeh, Chen-Feng Yeh, Cheng-Haw Lee*-----73
4. Comparisons of Pull-Out Resistance and Shear Strength Increment of Soil/Root System for Plants Commonly Used in Soil and Water Conservation: India-Charcoal Trema, Cotton Rose, and Subcostate Crape Myrtle ----- *Der-Guay Lin, Sheng-Hsien Wang, Wei-Hsiang Chen, Jui-Ching Chou*-----84
5. Topographic Recognition Model on Hillslope Type Debris Flow and Landslide ----- *Tien-Chien Chen, Yuan-Xun Luo, Wang-Chun Yang, Bo-Long Chen*-----95

Technical Notes

1. The Trajectory and Goal of Landslide Revegetation: A Proposal from the Viewpoints of Restoration Ecology -- *Ching-An Chiu, Hsien-Sheng Hsu, Shin-Hwei Lin, Wei-Chih Chen*---- 104
